PROFILE

Motivated aspiring Backend Developer with hands-on experience in front-end technologies (HTML5, CSS3, Bootstrap, jQuery) and relational databases (MySQL, SQL Server), currently building strong expertise in C# and ASP.NET. Passionate about developing robust, scalable, and efficient back-end solutions. Seeking an ASP.NET Internship to apply my technical knowledge, work on real-world applications, and grow as a proficient ASP.NET developer.

LEARNING EXPERIENCE

- Aptech Learning

AUGUST 2025 - FEB 2026

Web Apps Development

 - Currently developing my skills in C# and the .NET Framework, focusing on building back-end functionality, working with SQL Server, and understanding MVC architecture. Actively practicing API development, debugging, and writing clean, maintainable code as I work toward becoming a full-stack web application developer.
- Aptech Learning

AUG 2024 - AUG 2025

Website Development

 - Front-end focused web developer skilled in HTML, CSS, JavaScript, and Bootstrap, with additional experience using PHP and MySQL for basic back-end support. Capable of creating responsive, user-friendly interfaces and clean visual layouts. Regularly uses AI tools to enhance UI design concepts, streamline layout structures, and speed up the development workflow while maintaining high-quality code standards.
